

# GET THE BEST FROM YOUR TENNANT EQUIPMENT BY DEMANDING THE BEST *FOR YOUR EQUIPMENT*

## TENNANTTRUE® PARTS

You want your facilities cleaned right the first time, every time. You need to make the most of your staff time, so repeating a task due to poor performance is not an option. TennantTrue parts are designed to work precisely on our equipment, engineered to Tennant's exacting specs, and built to last, ensuring that you get the most out of your equipment and parts.

Every 30 minutes of extra cleaning equals \$198 in wasted labor costs per month or **\$2,370 annually\***

\*Based on a 7-day cleaning cycle with labor costs at \$13 per hour

## BRUSHES

- **Built to last**
- **Made with premium raw materials and a unique spline drive system**
- **Designed for superior performance and long service life by transferring power efficiently from hub to brush**

TennantTrue® brushes are designed with features like solution holes that ensure cleaning solution flows directly through brush to floor for optimal cleaning performance. Look-alike brushes omit this feature, wasting solution and potentially increasing the amount of time required to clean floors to a comparable level.

Another feature of TennantTrue brushes maximizes the wear-time: maximum bristle length provides longer wear, lowering the overall cost of the brush, while providing the ideal brush weight for good performance on your equipment. Look-alike brushes may require an adapter that adds weight to the brush and causes strain on your machine. At the same time, the space taken for the adapter reduces bristle length – so brushes wear out and require replacement at a faster rate.

*Obstructed holes block solution flow, wasting solution and labor time*

*Space taken for the adapter can reduce bristle length by up to **31%***

## SQUEEGEES

- **Designed specifically for your Tennant machine**
- **Maximize cleaning effectiveness in a single pass**
- **Maximize liquid collection and pickup so floors dry quickly**

Precise angling improves water pickup, and high-quality materials create a good seal with the floor and ensure long squeegee life for TennantTrue squeeeges. Look-alike substitutes may not be cut precisely and may not seal to the floor as well, allowing water and slippery solution to remain on the floor.

Using TennantTrue squeeeges reduces slip, trip and fall hazards.

*Gaps on look-alike squeeeges leave water on the floor due to their exaggerated angle*
