About BIM and BIMObject

BIMObject® links the complex technology around CAD and BIM with architects and the building product manufacturing industry.

BIM (building information modeling) is used globally – in projects ranging from room additions to entire hospitals.

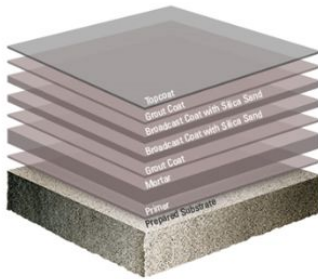

A BIM Object is a 3D representation of a physical object. It includes all kinds of data, up to and including manufacturer and warranty information.

How do I use BIM?

Sign up for a free account at [BIMObject.com](https://www.bimobject.com), then find the product you're looking for. You can search by category, search term, or brand.

Tennant Coatings offers up a variety of epoxy/resinous floor and wall coating solutions for your concrete or flooring projects.

Once you're signed in, download the appropriate revit model, place it into your modeling software, and experience the power and convenience of BIM.

Description	Links	Related	Classification
-------------	-------	---------	----------------

Tennant Heavy Duty Shop Floor DB (Double Broadcast) is a 7 layer, hybrid system of both an epoxy mortar system and a double broadcast shop floor system. This hybrid system is used to resurface floors while providing a heavy textured surface for extra slip resistance and added durability for high traffic and high abuse areas.
