

## ORBIO® 5000-Sc SINGLE AND DUAL AUXILIARY TANKS

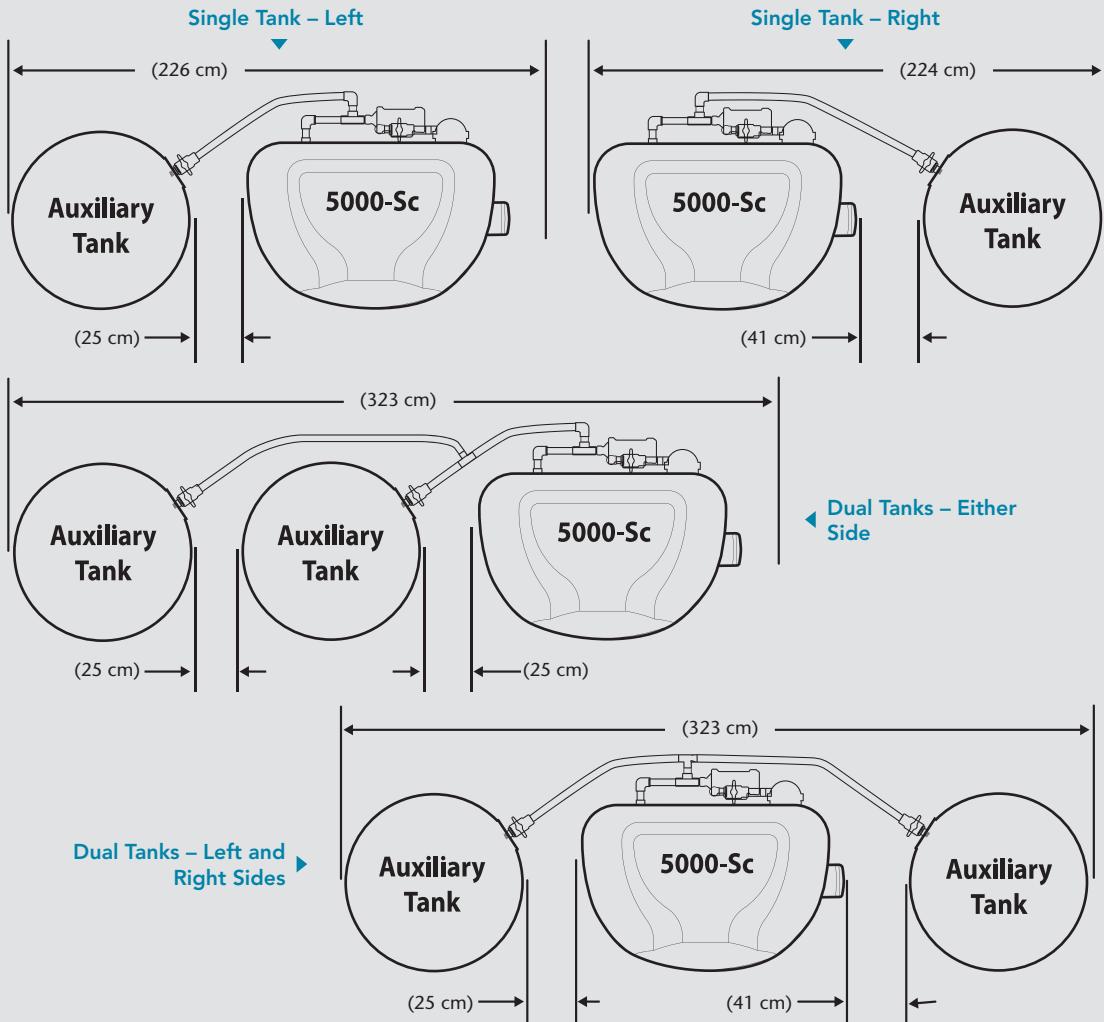

### Double or triple your available Orbio® 5000-Sc solution volume with auxiliary tanks

Create, store, and dispense an additional 500 L or 1.000 L of 5000-Sc solution by adding one or two auxiliary tanks to the 5000-Sc. These tanks are:

- Purpose-designed for use with the 5000-Sc
- Durable
- Easy to install

Install one or two tanks when peak demand exceeds the standard 5000-Sc 454 L tank capacity on a regular basis, such as when filling multiple large cleaning machines or solution transport carts at one time.

5000-Sc unit and any auxiliary tanks should be installed on an even surface so that the bases of a complete installation are at the same level. A 40,64 cm gap is required between an auxiliary tank and the right (inflow filter) side of the tank to allow for access to the inflow filter.

### Single and Dual Auxiliary Tanks

#### STANDARD CONSTRUCTION

Expansion tank	6 mm wall thickness polyethylene, 400 mm diameter vented lid, clear with liter markers
Connection hose	25 mm ID PVC
Fittings/Ball valves	PVC
Hose clamps	Worm-drive, stainless steel

#### DIMENSIONS/WEIGHT/CAPACITY

Height	1.550 mm
Diameter	700 mm
Weight (empty)	25.5 kg
Weight (filled)	538 kg
Usable capacity	500 L

Each tank comes complete with connection hose, fittings, ball valve, clamps, safety/regulatory labels, and installation instructions. For dual tank configurations, order two tanks - all necessary fittings and hoses are shipped with the tanks. Specifications subject to change without notice.
