

Smart-Fill™ Automatic Battery Watering System

Increase battery life, extend battery run-time and easily optimize long-term battery performance with a nearly maintenance-free battery watering system.

BENEFITS OF SMART-FILL

- **Simple:** On-board system means virtually worry-free battery maintenance
- **Smart:** Accurately fills batteries at the best time in the charging cycle
- **Safe:** Removes the task of checking, opening and filling flooded batteries

Prevent operators from using scrubbing functions on dry batteries with patent-pending Smart-Fill technology.

Receive email alerts when water reservoir is low with IRIS® Asset Manager.

Ensure the distilled water tank is filled at the right time, every time with battery water level alerts.

Reduce battery costs and increase serviceable life, especially when switching from sealed batteries.

Exclusive Smart-Fill battery watering can help reduce costs to clean and extend battery life so you can focus on your business.
