

CREATING A CLEANER, SAFER, HEALTHIER WORLD.

SOLUTIONS

# Food and Beverage Floor Care Solutions

SUPERIOR CLEANING PERFORMANCE TO ACHIEVE INDUSTRY STANDARDS

- Reduce water usage and labor costs, and save money through innovative cleaning solutions
- Improve your staff's comfort, safety, and productivity with simple, ergonomic controls
- Lower your total cost of ownership with proven reliability and performance of equipment, cleaning technologies, coatings, and service

# TENNANT CLEANING SOLUTIONS – EQUIPMENT, CLEANING INNOVATIONS, COATINGS, SUSTAINABLE SOLUTIONS AND SERVICE

## GET MORE FOR YOUR FACILITIES

For food and beverage manufacturers and distributors, effective cleaning is critical to success. At every stage – preparation, processing, packaging or bottling, storage and transportation – your operations require conditions you can trust. Product safety, employee and customer health, and regulatory compliance depend on meeting standards for cleanliness.

Tennant offers exclusive cleaning solutions that deliver exceptional results while saving you time, resources and money. Tennant advantages help you:

- Achieve required productivity with reliable machines
- Reduce water usage with ec-H2O cleaning technology
- Improve air and final product quality with excellent dust collection systems
- Clean in tight spaces with maneuverable compact machines
- Save money and reduce environmental footprint with chemical-free cleaning
- Protect floors and make cleaning easier with seamless, thermo-resistant coatings

Built on a tradition of durable equipment, these industry-leading results help you maximize cleaning productivity.

## FROM INSIGHT TO INNOVATION

By electrically converting water into an innovative cleaning solution, ec-H2O™ technology cleans effectively, saves money, increases safety, and reduces environmental impact as compared to daily-cleaning floor chemicals. NFSI certifies that ec-H2O technology significantly improves floor traction, which can reduce slip-and-fall incidents. NSF registration means that ec-H2O is safe to use even in food and beverage handling environments.

Orbio® split stream technology generates a cleaning solution that replaces many daily-use conventional cleaning chemicals used on and off the floor. It can reduce the expense, effort, and environmental footprint associated with conventional daily-use cleaning chemicals. Produced exclusively by the Orbio 5000-Sc, the solution is high-traction certified by NFSI to reduce the potential for slip-and-fall accidents, and registered by NSF as appropriate for use in food and beverage handling environments.

Foam Scrubbing Technology (FaST) thoroughly cleans floors while using 70% less water than conventional scrubbing systems. The system creates a foam that is effective on all hard floor finishes, drying quickly so floors can be used again sooner. FaST is NFSI certified for providing high-traction surfaces.

Extended Scrubbing (ES) technology recycles cleaning solution to extend scrubbing time and increase cleaning productivity. This innovation lets you reduce water consumption by up to two-thirds and achieve longer run times.

### COATING AND WALL SYSTEMS

Ideal for food and beverage processing facilities, the Eco-ProTekt™ system consisting of four primary coating products – Eco-CTO™, Eco-CFO™, Eco-CVO™, and Eco-CWO™ – offers a coating solution that is seamless and resistant to chemicals, bacterial growth and the presence of extreme thermal variations. Our fiber mat wall system saves time and reduces maintenance costs with an impact resistant, seamless and easy-to-clean surface.

CLEAN ANYWHERE, ANY TIME

#### IDEAL MODEL FOR FOOD AND BEVERAGE FACILITIES

The powerful, versatile T16 battery-powered scrubber delivers fume-free operation at just 68 dBA, and can achieve up to 20% lower cost of ownership with Tennant's quality construction and innovative technologies.

Featuring a steering wheel mounted Touch-N-Go™ control module with simple one-button operation, enhancing operator safety and ease of use. Easy-to-identify yellow maintenance touch points ensure daily maintenance items are easily located and checked, protecting your investment.

The T16 can be equipped with any one of three exclusive Tennant cleaning technologies to achieve superior cleaning results, while reducing water consumption and disposal.

## INCREASE PRODUCTIVITY AND PROFITABILITY

Cleaner, safer, healthier food and beverage facilities are more productive and profitable. The right equipment will help you achieve consistently high levels of workplace safety and employee health. With Tennant technologies, you can:

- Reduce the risk of slip-and-fall injuries with high-traction NSF® certified equipment
- Improve indoor air quality with battery-powered walk-behind and riding machines
- Reduce the use of daily-cleaning floor chemicals with ec-H2O technology
- Maintain sanitary tanks with easy-to-clean Hygenic® solution and recovery tanks

Tennant offers a variety of scrubbers, scrubber-sweepers, and sweepers that help protect your people, products and plants. Below is a list of equipment ideal for food and beverage environments:

### WALK BEHIND SCRUBBERS:

- **T1B Lithium-Ion Battery Micro-Scrubber-Dryer**  
Compact size with maneuverability in tight spaces
- **5680/5700 Battery-Powered Walk-Behind Scrubber**  
Industrial-strength scrubber cleans tough floor messes

### SCRUBBERS AND SCRUBBER-SWEEPERS\*:

- **7300 Battery-Powered Riding Scrubber**  
Fume-free, with long run-times and wide scrubbing path
- **M20 Integrated Scrubber-Sweeper**  
Integrated machine reduces cost of ownership
- **8300 Battery-Powered Sweeper-Scrubber**  
Dry sweep and scrub, fume-free with long run-times

### SWEEPERS:

- **S20 Compact Midsize Ride-On Sweeper**  
Full-size performance from a compact machine
- **S30 Midsize Rider Sweeper**  
High-capacity hopper with a wide sweeping path

\*Available with optional ec-H2O or FaST cleaning innovations

## FLEXIBLE SUPPORT, SERVICE, AND FINANCING

### FACTORY-DIRECT SERVICE PROTECTS YOUR INVESTMENT

Keep your cleaning program consistently up and running with help from the industry's largest and only factory-direct service network of over 400 locally-based and factory-trained service technicians located across the U.S. and Canada. Service reps have direct access to genuine parts from Tennant. Parts and consumables are precision fit for Tennant branded equipment ensuring better performance from your machine.

### TENNANTTRUE® SERVICE PROGRAMS

Optimal performance depends on planned maintenance. Trust TennantTrue service to deliver technical expertise with unmatched knowledge of Tennant equipment. You also receive quick answers with Tennant's Tech Line, staffed with our expert service representatives. Choose a planned maintenance program based on your cleaning needs.

### FINANCING OPTIONS IMPROVE YOUR BOTTOM LINE

Tennant's flexible financing and lease programs are designed to help you manage your cash flow and get the equipment you need. Our FlexClean® program offers a simple, pay-for-use option to put Tennant cleaning performance to work for your business.

ec-H2O™ and FaST® technologies are NFSI (National Floor Safety Institute) Certified. NFSI certification ensures a product has passed a 2-phase testing process, designed to demonstrate the floor product's effectiveness at reducing potential slip-and-fall accidents.

ec-H2O and FaST technologies are registered by NSF International. NSF International is an independent, not-for-profit organization that ensures product formulation and labels meet appropriate food safety regulations.
